

HIGHLANDER SECURITY SHREDDING

On-Site Shredding vs. Off-Site Shredding

Pollution

On-Site

- Noisy running engines
- Higher diesel emissions
- Long term environmental damage
- Chronic air pollution
- Small, time-consuming shredders

Off-Site

- Quick efficient collections
- Safe & secure transportation
- Efficient volume shredding
- Eco-friendly power process
- More prevalence of EV powered electric systems

Compliance

Off-Site

- EN15713 standards/industry guidelines are met
- ISO27001 for information security status is held
- UKSSA membership indicating stricter guidelines for compliance in comparison to EN15713

On-Site

- Exactly the same compliance is met.

Security

On-Site

- Kerbside / car park subject to severe weather conditions
- Risk to security
- Vulnerability

Off-Site

- Most secure service & collection method
- 24 hrs GPS vehicle tracking
- Full audit trail from collection to shredding
- Complete security / vetted staff / 24 hrs CCTV
- Documents handled at point of shredding only

Onward Recycling

On-Site

- May not use own processing site
- Documents often sold through a 3rd party handling
- No guarantee over consequent end destination of the shredded paper

Off-Site

- Loading
- Baling
- Delivery direct to the allocated paper mill
- Re-pulped into a new paper grade for on-going use
- 100% recycling process guaranteed
- Start to finish - cradle to grave
- Collection shredding certification
